Claims 1-10 and 28-38 are allowed. Claims 11-27 and 39-64 were canceled by applicants' under a preliminary amendment. All pending claims thus being allowable, prosecution on the merits is closed in this application.

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter: the prior art taken either singly or in combination fails to anticipate or fairly suggest the features/limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. More specifically, in regard to these independent claims,

Independent Claim 1 the prior art taken either singly or in combination fails to anticipate or fairly suggest an apparatus for enhancing the vision of a user comprising, *inter alia*, a focal modulating device adapted to focus light onto the retina of a users eye, while: "alternating between at least first and second focal states that are characterized by different, respective first and second focal depths, at a rate in excess of a flicker-fusion frequency of the user" (Claim 1, Lines 4-6), taken together in combination with the totality of particular features/limitations recited therein; and

Independent Claim 28 the prior art taken either singly or in combination fails to anticipate or fairly suggest a method for enhancing the vision of a user comprising, *inter alia*, focusing light onto the retina of a users eye: "in alternation between at least first and second focal states that are characterized by different, respective first and second focal depths, at a rate of alternation that is in excess of a flicker-fusion frequency of the user" (Claim 28, Lines 3-5), taken together in combination with the totality of particular features/limitations recited therein.

Other Remarks/Information

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be labeled "Comments on Statement of Reasons for Allowance."

The International Search Report (PCT/ISA/210) and the Written Opinion of the International Searching Authority (PCT/ISA/237) prepared by the European Patent Office on 02/25/2005 and

04/03/2006, respectively, for the parent (PCT/IL04/00786) for the instant National Stage application. All of the documents and other material cited in the PCT/ISA/210 and PCT/ISA/237 have been considered by the examiner in the prosecution of the instant application.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cox (U.S. Patent No. 7,118,214 B2) discloses apparatus providing presbyopia correction in the form of a multifocal translating style alternating vision contact lens or a simultaneous vision style correcting lens; Blum et al. (U.S. Patent No. 7,018,040 B2) discloses an electro-active contact lens system which provides vision correction of one or more focal lengths; Klein (U.S. Patent No. 4,842,400) discloses visual apparatus to limit the instantaneous luminous intensity without reducing the field of vision which includes liquid crystal modulator elements operated at frequencies in excess of the flicker-fusion rate of the user.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
